

Add Health Media

Communicating health for life

To whom it may concern,

I have been Martin Tenovskis direct manager during his time at Add Health Media, one of the biggest media companies within medicine and health in the Nordic region. Martin was a part of our digital team from 2021-09-27 to 2023-04-12 where he worked as a designer.

Martin is a very happy person, always with a smile on his face. He contributes with positiveness in all situations. We have invited him twice to come and visit us in Sweden, both times have been great times where he socializes with everyone very well. We appreciate him as a person a lot.

One of the skills that we have appreciated the most is how prestige less he is; he takes in and listen to all kinds of feedback and reflects on it to improve himself. Martin is also very open to learn new things and take on new assignments, which is very valuable in our small company where everyone needs to step in where needed. As a team member he always wants to help and ease someone else's workload.

When he is about to present his work, he shows up prepared with power point slides, sketches from the design process and motivate why he ended up with the final suggestion. It gives a clear image of his whole idea and shows how engaged he is.

I hope you will enjoy Martin as part of your team and company as well as we have. Hope you can provide him with the opportunity to keep developing and grow his skills. We wish him all the best in the future.

Best regards,

Moa Järefall
Head of Production
